

Medical Needs

We are here to support, but need information from parents to ensure the well being of all our students.

We need information from parents on all students who have a particular medical concern that could effect them in college, in order to initiate a personalised action plan if required. This will inform all staff of any needs that a student may have whilst in college.

It would be helpful if parents could provide the following information for their child:

- Name of medical condition.
- Any signs or symptoms that their child would show if he/she was becoming unwell.
- Steps that are taken to minimise any risk.
- Procedures to follow if their child becomes unwell.
- Any medication or special diet that their child would require during the school day.
- Names and telephone numbers to contact in an emergency.
- Any further details that you consider the college should be aware of.

Parents with any concerns will be asked to fill in a confidential individual health plan, a copy of which can be downloaded from this website.

If Medications are required during the college day a parental agreement to administer medication will also be required.

If it is felt necessary for a child to have an individual medical action plan, a copy will be forwarded to parents for their information. These will be updated each school year.

Any concerns or completed letters/forms should be directed to Mrs K Matta (medical needs co-ordinator)
or
Mrs S Fowell (Student Support Manager)
